

PROMETIM

Industrial Maintenance & EPC Services
for the Energy Sector

COMPANY OVERVIEW

www.prometim.net

About Us

PROMETIM is a bold, fast-moving industrial services group, with deep roots in Angola and a growing footprint across Africa. We bring local strength, operational excellence, and a deep understanding of the terrain — both physical and regulatory.

MISSION

To be a trusted partner for companies in the energy sector, providing safe specialized maintenance solutions, that enhance efficiency and promote sustainability.

VISION

To be a leading reference in specialized maintenance services for the energy sector, driving the ongoing success of our customers and partnering strategically in the transformation of the energy market.

VALUES

We are dedicated to Integrity, Safety, Continuous Improvement, Customer Focus, Sustainability, and Social Responsibility in everything we do.

Overview

Prometim is a company specializing in a comprehensive range of industrial services, including maintenance and asset integrity, EPC construction projects, fabric maintenance, logistics & manpower solutions, and facilities maintenance.

With a strong focus on operational excellence and reliability, Prometim delivers integrated support across various sectors to ensure the efficiency, safety, and longevity of client assets and infrastructure.

10+

Our Core Areas

Prometim delivers tailored industrial solutions designed to enhance performance, extend asset life, and drive operational excellence - built on expertise, efficiency, and a commitment to quality.

Major Offshore Contracts

Training Manpower

EPC Projects

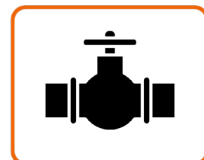

Prometim typically holds contracts with Majors for:

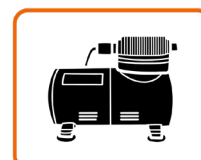

GMC Luanda Refinery

Diesel & Gas Engines Maintenance

Valves Maintenance

Pumps & Compressors Maintenance

Flexible hoses and SBT Management

E&I Services and Inspections

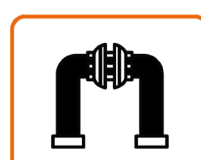

Fabric Maintenance Services

Spot Fabric Maintenance Field Services

Specialize Pressure Vessels Services

Flange Management during shutdowns

Flushing and Nitrogen Services

■ Procurement	24

General Maintenance Contract (GMC)

Overview

We are a trusted provider of integrated industrial services, specializing in General Maintenance Contracts (GMC) for both onshore and offshore operations.

Services

- Preventive and Corrective Maintenance
- Shutdown and Turnaround Support
- Manpower Supply
- Inspection and Testing
- Piping, Welding, and Fabrication
- Rotating Equipment Maintenance
- HVAC System Maintenance
- Scaffolding, Painting, and Insulation
- Procurement and Spare Parts Supply
- 24/7 Emergency Response

EPC Projects

Overview

We deliver end-to-end EPC (Engineering, Procurement, and Construction) solutions tailored to complex industrial and energy projects.

Services

- Engineering & Design
- Project Management
- Procurement Services
- Construction & Installation
- Fabrication Services
- Pre-Commissioning & Commissioning
- Quality Assurance & Control (QA/QC)
- HSE Management
- As-Built Documentation & Handover
- Post-Construction Support

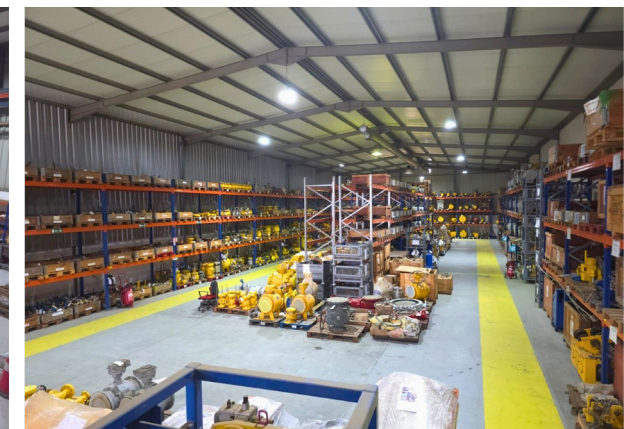

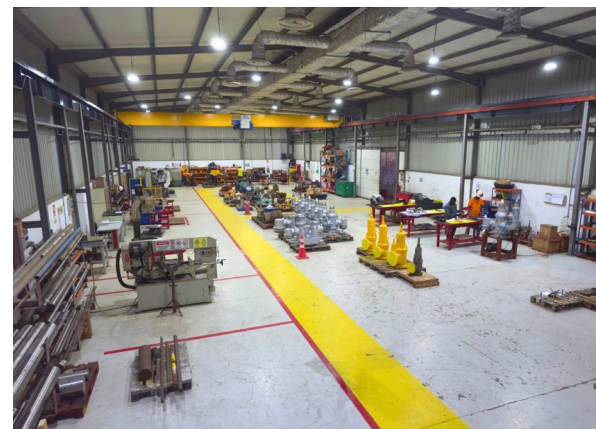

Mechanical Workshop

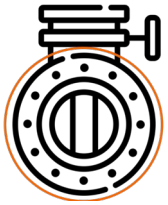

Overview

Specializes in preventive and corrective Mechanical Maintenance with complete Workshop solutions.

Services

- Valve repair (On/Off, PSV)
- Pump & compressor maintenance
- Mechanical seals repair
- Lifting equipment repair & recertification
- Machining, welding, and fabric maintenance
- Sandblasting & painting
- Load cells & scale calibration

Valves

Overview

Comprehensive valve lifecycle services both on-site and off-site, supporting diagnostics, maintenance, and certification.

Services

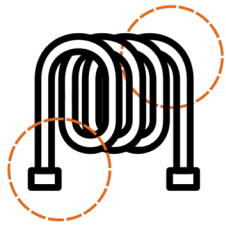

Onshore Services

- Surveys, sizing & diagnostics
- Valve Repair & Testing
- Safety valve certification
- Modernization and upgrades
- Outage and lifecycle planning

Offshore Services

- All types of valve testing and repair
- Actuator and controller maintenance
- Certification of relief valves

Flexible Hoses Workshop

Overview

Specialized in flexible hoses, hydraulic systems, and data-driven integrity management through Hydrasun.

Services

- Offshore surveys
- Hose assembly, testing, certification
- Hydraulic system troubleshooting & upgrades
- Flushing & filtration
- Accumulator and piping system maintenance
- Data management via Hydralink
- SBT (Small Bore Tubing) Integrity Management

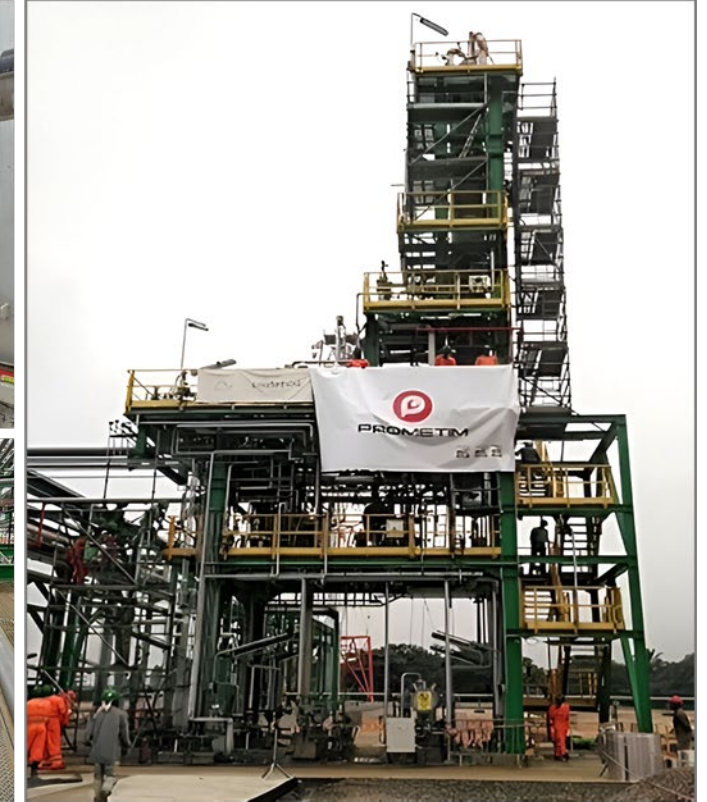

Fabric Maintenance

Overview

We offer comprehensive fabric maintenance solutions, including scaffolding, sandblasting, painting, and insulation services.

Services

- Pipping pre-fabrication
- Complete Erection including Metallic Structure
- Tanks Fabric Maintenance
- Fire-water pipping pre-fabrication & installation
- Painting, Insulation & Scaffolding Activities

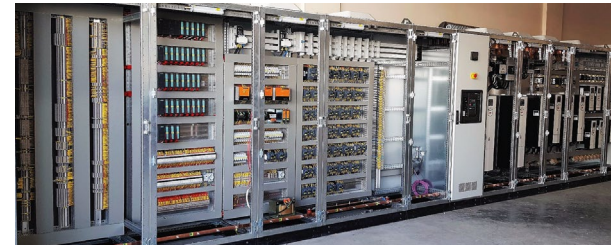

Field Services

Overview

We deliver end-to-end field services, covering pipelines, pressure vessels, heat treatment, and E&I systems. We also offer scaffolding, painting, and support solutions to ensure safe, efficient industrial maintenance.

Services

- Process, Pipeline & Mechanical services
- Pressure Vessel Services
- Heat Treatment Services
- Electrical, Instrumentation, Automation Systems
- Scaffolding and Painting Services

Field Services

Process, Pipeline & Mechanical

Overview

In partnership with LTP Solutions, we provide specialized services for pipeline and process systems during pre-commissioning, commissioning, and maintenance phases.

Process Services

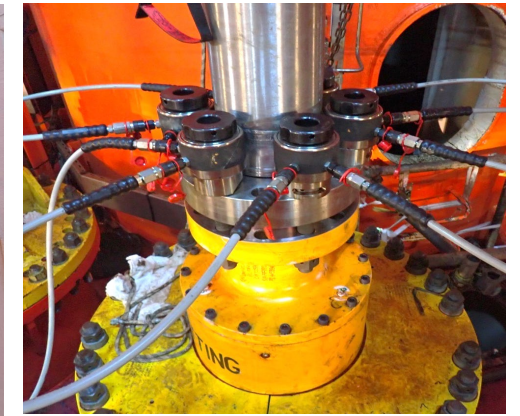

- Helium Leak Detection (HLD)
- Hot Nitrogen Purging & System Inerting
- Gas Lifting
- Kamos Testing (Reverse Integrity Testing)
- Critical Valve Testing LN2 Pipe Freezing Process System

Pipeline Services

- Hydrostatic Testing
- Pigging Solutions (Offshore-Inland)
- Chemical Cleaning
- Flooding, Cleaning & Gauging
- De-Watering, Swabbing

Mechanical Services

- Hydraulic Bolt Torquing & Tensioning
- Cold Cutting & Beveling
- Flange Face Machining
- Custom Software Integration Process System

Field Services

Pressure Vessels

Overview

In partnership with GasCon, we provide ASME “R” Stamp-certified pressure vessel manufacturing, repairs, and inspections, ensuring safety and compliance across industrial sectors.

Services

- Only **ASME-R Stamp** certified facility in Southern Africa
- **NBIC electronic registration of “R” stamp repairs**, alteration & modification endorsed by Authorized Inspection Authority.
- Pressure Vessel Manufacturing (RSA)
- Pressure Vessel Repairs & Modifications
- Pressure Vessel Pressure Testing & Leak Detection
- NDT (PT, UT, RT, MT and other) services.
- Pipe Fabrication
- On-site Installation
- 3D laser Scanning & Reverse Engineering

Field Services Heat Treatment

Overview

In partnership with Traterme, we deliver advanced heat treatment services for critical components across industrial, manufacturing, and energy sectors.

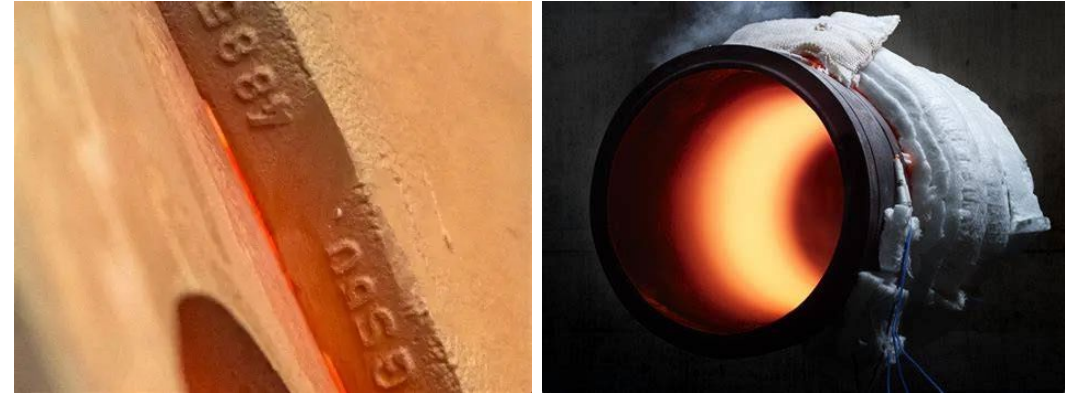

Services

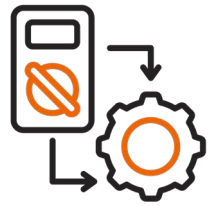

- Hardening (water, oil, polymer and vacuum)
- Induction Hardening
- Nitriding
- Carburising
- Carbonitriding
- Annealing
- Tempering
- Normalising
- Stress Relieving - (from small parts to very large parts)

Onshore Treatment:

The following services, which can be performed by electrical resistance, induction or gas, are:

- Pre-heating
- Post-heating
- Stress relieving / PWHT
- Normalising
- Hydrogen Bakeout
- Shrink-fitting

Field Services

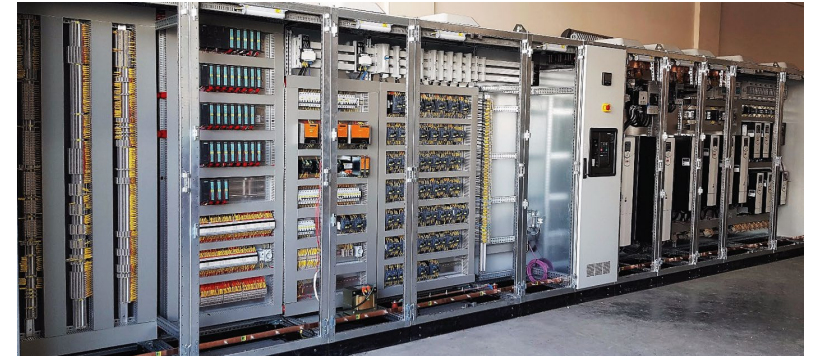

Electrical & Instrumentation

Overview

We delivers end-to-end electrical and instrumentation solutions, from substations and switchyards to modular unit assembly and hazardous area installations.

Services

- Substations and switchyards
- Switchgear and control systems installation
- Underground cabling
- Switch room and control room installation
- Instrument tubing
- Hazardous area installation
- Assembly of modular units and skids
- Cable ladder installation
- HV, LV control, instrument communication cabling and terminations
- Earthing and lighting protection
- Light and small power installations

Field Services

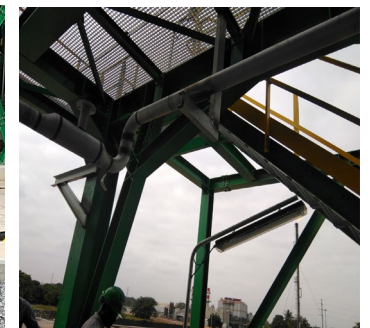

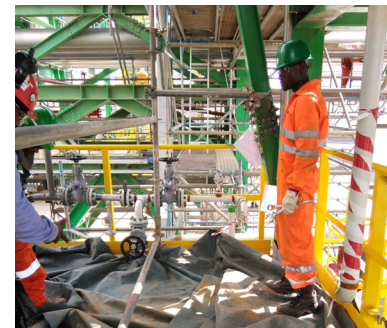

Scaffolding & Painting

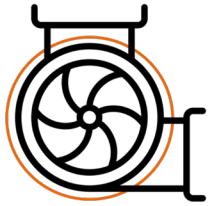

Overview

We delivers end-to-end electrical and instrumentation solutions, from substations and switchyards to modular unit assembly and hazardous area installations.

Services

- Scaffolding
- Sandblasting
- Painting
- Insulation
- Scaffolding equipment for
- Rental (*1)
- Specialized scaffolding
- manpower

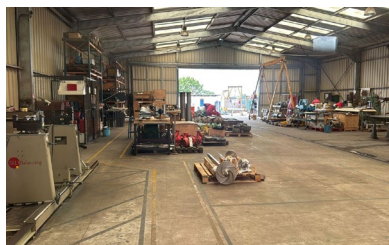

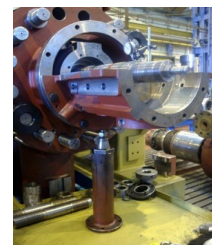

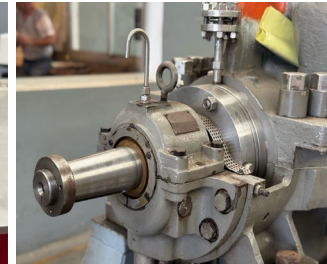

Rotating Equipment

Overview

Comprehensive support for pumps, compressors, and hydraulic systems in workshop and field settings.

Services

- Pump maintenance, seal repair
- Hydraulic system troubleshooting
- Laser alignment, vibration analysis
- On-site machining & nitrogen fitting
- Predictive and preventive strategies

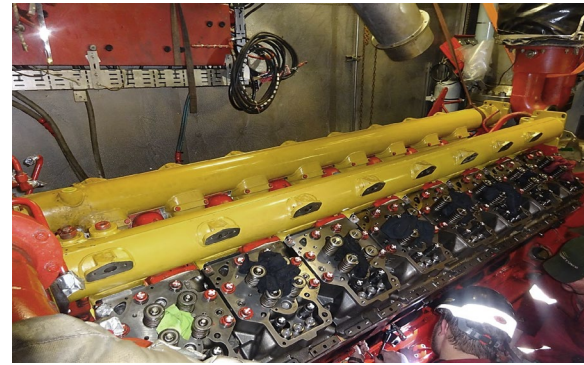

Diesel & Gas Engines

Overview

Our services include onshore and offshore surveys, preventive and corrective maintenance, major overhauls.

Services

- Cold Repair – Iron parts
- Machining
- Reconditioning of surfaces
- Pistons
- Valves and seats
- Alignment
- Dimensional control
- OEM's Spare parts supply

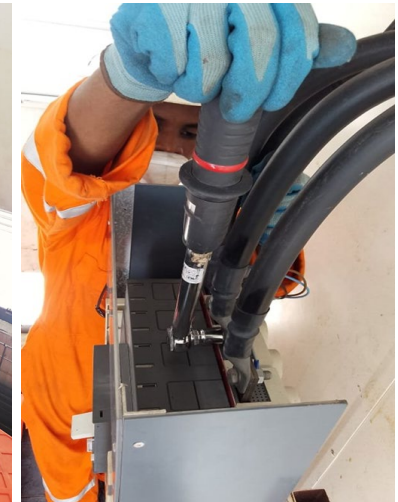

Energy & Facilities Maintenance

Overview

Integrated technical services for energy and industrial infrastructures with 24/7 availability.

Services

- Electrical & mechanical systems
- HVAC and Generator Maintenance
- Fire safety & water treatment systems
- Corrective & predictive maintenance
- Multi-skilled teams for rapid deployment

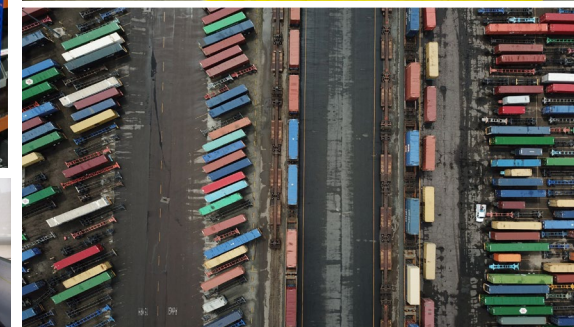

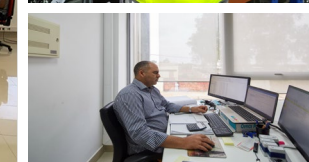

Procurement

Overview

Strategic sourcing & supply chain solutions tailored to the energy sector.

Services

- Material and equipment procurement
- Logistics & international shipping
- Cost control, budgeting, and contract management
- Compliance with API, ISO, ASME standards
- Sustainable procurement practices

Our Certifications

ISO 45001, 9001, 14001

Our company is proudly certified to three internationally recognized ISO standards, reflecting our unwavering commitment to operational excellence, environmental responsibility, and employee well-being:

Global Strategic Partners

PROMETIM in Angola, represents multiple global leading manufacturers and service companies.

Global Strategic Clients

Prometim is proud to represent and support businesses in achieving their goals by providing access to cutting-edge technologies, expertise, and reliable partnerships.

Final Message

**“Together, We’re shaping Africa’s energy future — with resilience, ambition, and purpose.”
we’re not just chasing contracts.**

Let’s build this legacy, together!
