

# Fabric Maintenance

We provide end-to-end fabric maintenance solutions designed to preserve structural integrity and extend the lifespan of industrial assets. Our services include scaffolding, sandblasting, painting, insulation, and structural works—delivered with a focus on safety, quality, and efficiency.

## Piping Pre-Fabrication

- Offsite fabrication of piping systems to reduce site installation time, improve quality control, and streamline project execution.

## Complete Erection Including Metallic Structure

- Assembly and installation of steel structures and supports, ensuring precision alignment, structural integrity, and compliance with project specs.

## Tanks Fabric Maintenance

- Maintenance, repair, and coating of storage tanks, addressing corrosion, structural wear, and ensuring long-term serviceability.

## Fire-Water Piping Pre-Fabrication & Installation

- Design, fabrication, and installation of fire-water systems, meeting safety codes and ensuring readiness for emergency response.

## Painting, Insulation & Scaffolding Activities

- Protective industrial coating, thermal insulation works, and safe scaffolding access solutions to support maintenance and corrosion prevention.
